

Steel and mechanical engineering: Buse Heberer Fromm advises Maurer on transformation into a European Company (SE)

November, 2016 — Dusseldorf
Ansprechpartner: Lars Roßner

Since 1876, the Maurer Group has been operating an independent steel and mechanical engineering enterprise, which focuses primarily on construction protection systems and steel construction. The Maurer Group is a technological global leader in its specialist areas, which include the production of ferris wheels and rollercoasters.

Maurer AG was created in 2014 when Maurer Söhne GmbH & Co. KG, the ultimate parent company of the Maurer Group, changed its legal form into a stock corporation (Aktiengesellschaft).

By choosing the legal form of an SE, Maurer AG's stockholders decided to implement the internationally widespread monistic management system in which a Board of Directors bears the responsibility for the management of the company as well as for appointing its executive directors.
